

MINH LAM BUILDING

OUR COMPANY PROFILE

PROFILE

Founded in 2006, MLBuilding is a general contractor and construction project management company with a strong experience in building commercial, industrial and office spaces.

We are committed to bring every project to its successful completion by meeting our clients requirements - deadline, budget and quality - and by sharing our knowledge and expertise.

MLB owes its success to its management expertise, which is greatly appreciated by our clients who continue to use our services as they expand. Our relationship with our clients is as important as the projects themselves.

We only work with a network of reliable and experienced sub-contractors who share our vision of achieving client satisfaction in all aspects of the build process, whilst delivering cost-effective services on a long-term basis.

Every project receives our utmost care and dedication.
